The image is a very low-quality, high-contrast scan of a document. It appears to be a ledger or a form with multiple columns and rows. The text is completely illegible due to the poor quality of the scan, which shows only dark, noisy shapes against a light background. There are some faint, dark, irregular shapes that might represent text or markings, but they cannot be transcribed.

The figure consists of two separate line graphs. The left graph plots 'Rate of reaction' on the y-axis against 'Temperature (°C)' on the x-axis. The curve starts at a low rate at 10°C, rises to a peak at 30°C, and then declines at 40°C. The right graph also plots 'Rate of reaction' on the y-axis against 'Temperature (°C)' on the x-axis. This curve shows a continuous, exponential increase in the rate of reaction as the temperature rises from 10°C to 40°C.
